

Dimock Residential GW Site – Lab Summary

2/8/2012

Sample Receipt Status

Samples continue to be shipped to all labs. Total received by R3 lab is 142 samples.

A completeness verification is being conducted for all samples shipped to date.

- Missing sample - HW01 was not shipped to R9 for dissolved gases. R9 is using the extra vial provided for TPH.
- HW19 is missing total metals, anions, alcohols, glycols, and O&G
- HW25 is missing everything - probably did not sample for HW25 (only an HW25-P)
- HW26 and HW26-P are missing VOAs, dissolved gases and GRO.

Analysis Status

All analyses proceeding on schedule for all Labs with no issues noted.

Reporting Status

Updated Partial Prelim Results for 39 samples: 15 samples have all prelims for expedited constituents (exc ept HW01). HW01 for dissolved gases was not shipped to R9 but is currently being analyzed. Total of 39 samples have prelims submitted (26 sample locations). Draft prelim report sent for VOCs, SVOCs, Anions, and TP.

Final reports for first and second set of MBAS and Dissolved Gases/TPH uploaded to FTP Site.

Some samples had constituents above the screening level. Final review for these samples is currently underway. All other results submitted are below screening levels or non-detected.
